I cannot make the meeting tomorrow due to the time.

I do not agree with the project Neptune data center. What an awful use of so many acres of land. AI is awful and going to be the downfall of humanity and we cannot afford the water use or the extra energy use; not to mention all the extra cost that will surely be passed to the residents here. It's so sad that it's coming to this and this is what we have to fight against. AI is already making us fight for our own health and the health of our environment.

Absolutely no to project Neptune. Let the land remain as it is!

- Morgan King, st lucie county native.
