Planning Commision,

I am writing as a resident and member of the Fort Pierce community to express my concerns and opposition to the proposed data center development in our area.

While I understand the importance of economic development and attracting new businesses, I believe a project of this size and nature deserves careful consideration because of its potential long-term impact on our community.

My concerns include:

- Increased demand for electricity and water resources.
- Potential noise pollution from cooling systems and backup generators.
- Traffic and infrastructure impacts during construction and operation.
- Possible environmental effects on surrounding land and natural resources.
- The long-term impact on nearby residential neighborhoods and the overall character of Fort Pierce.

Fort Pierce is a growing community with limited infrastructure resources, and major developments should be evaluated based on how they affect current residents, taxpayers, and future generations.

I respectfully request that city and county officials conduct a thorough and transparent review of the proposed data center, including its environmental impact, water and energy consumption, noise levels, emergency preparedness, and economic benefits to the local community.

I also encourage officials to provide residents with meaningful opportunities to ask questions, review the development plans, and participate in public discussions before any final decisions are made.

Economic development should benefit the entire community, and I believe Fort Pierce deserves growth that is responsible, sustainable, and consistent with the needs and values of its residents.

Thank you for your time and consideration. I respectfully ask that you take the concerns of local residents seriously when evaluating this project.

Sincerely,

Kaisha & Evans Belizaire
