Dear Members of the Planning Board,

Please distribute this correspondence to all members of the planning board and include it in the official public records for the Willow Lakes Project Neptune matter. Please also confirm receipt of this message.

To the Planning Committee,

As a resident of Western Fort Pierce living just a couple of miles from the proposed site, I am writing to express my strong concerns regarding the planned AI data center. Allowing this project to proceed so close to residential areas will have a profoundly negative impact on our community.

My primary concerns include:

- Water Usage: This operation requires significant amounts of water to function. How can residents be assured that this will not strain our local water supplies?
- Health and Safety: Although radiation levels are reported to be low, there is insufficient long-term research to ensure the safety of families and children living near such a facility.
- Pollution: The potential air and noise pollution generated by this facility could severely impact the quality of life for nearby residents.
- Community Impact: Our area is known for its tranquil, rural environment and has recently expanded with new neighborhoods like Wylder to attract new families. A project of this nature will deter future residents and harm community growth.

Thank you for considering these concerns.

Sincerely,
Samantha Albritton
